

*CASE STUDY*

# Large Brazilian Retailer

# Large Brazilian Retailer

## THE SITUATION

Retail uses senhasegura to incidents and outages by over 90%

- ✓ Retail business with an extensive network of branches, with a hybrid architecture on premise and multi-cloud.
- ✓ Over 5,000 certificates used across different platforms and devices.
- ✓ Exposure to security breaches due poorly managed certificates.

### Problem

Significant security risk due to unmanaged and expired certificate.

Operational interruptions due to expired certificates.

Difficulty in detecting and responding quickly to certificate failures.

### Solution

Implement certificate manager for automated, centralized management.

Automatic renewal and revocation of certificates to ensure continuous validity.

Implement of security policies for issuing and managing certificates.

Detailed auditing and reporting on the status and health of certificates.

### Results

+90% reduction in incidents related to expire certificate.

Management of over 5,000 certificates in senhasegura Certificate Manager.

Streamlined certificate management reducing administration time.
